

Inclusion-rule sensitivity at the 50% data cutoff

API metrics, explicit note evidence, and the paper's curated selection produce different sets.

B | What changes

API-metric rows

15 points from metric-bearing rows in the declared population.
Structured API metrics; no validator-clean inference.

Public-note parser

16 points; prose format changes admission.

API-only: ddb641a, 3bd88ad, 71b9cc4

Note-only after re-frontiering: b6f2b0a, f1d8707, 39a9b5f, 05f3483

Paper-admitted set

8 points under the paper's curated admission rule.

Pinned-response frontier adds 11 IDs.

Paper-only after re-frontiering: b6f2b0a, f1d8707, 39a9b5f, 4352cfb

Interpretation

Main figure uses the paper-admitted set.

Other sets are sensitivity analyses, not alternate headline results.
